

ELECTORAL REGISTER

Comprehensive & Fully Featured

eXpress is a complete electoral registration and election management system. All features of the system are accessed via intuitive and easy-to-use Windows styled interfaces, providing optimum performance and functionality while harnessing the power and flexibility offered by Microsoft products.

Registers

eXpress handles both published and rolling registers simultaneously while handling the annual audit register, historical published and test registers separately.

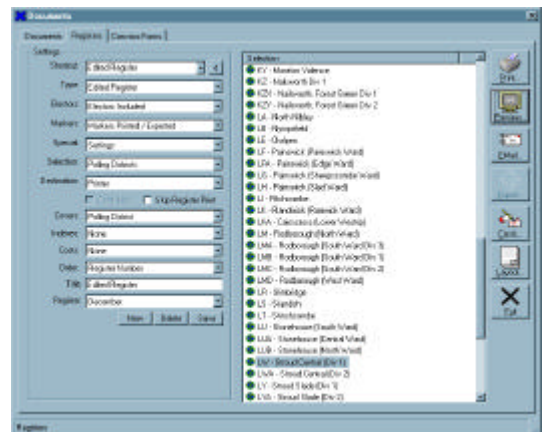

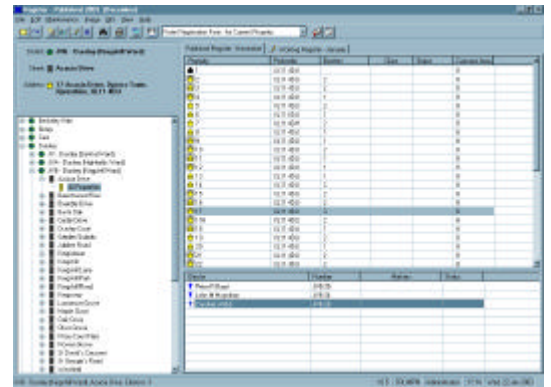

Preview your registers on screen and distribute them easily in paper, data (automatically zipped), PDF and email formats. Print on demand those copies needed later in the year. eXpress allows you to change the register layout, so you could produce a large text version for the partially sighted or save some trees with a condensed duplex version. Street indexes and front covers can be automatically produced with the register or separately.

Don't be limited by what you can do with historic registers, as all the standard features such as statistics, register printing and reports etc. are always available.

Register Renumbering

After completing your annual canvass or boundary reviews eXpress will renumber your registers. This simple process can renumber all or selected registers in seconds.

Why wait, let eXpress take the strain out of renumbering registers. Need to renumber one polling district? You can with eXpress.

Register Maintenance

The ability to create and maintain the register has never been so easy. Create, modify and delete polling districts, streets, properties, ranges of properties and electors within seconds. All elector marker types are handled by eXpress with automatic acknowledgement of changes sent directly to the elector.

Dynamic input screens ensure the integrity of your data, and ease of use.

Rolling Register Maintenance

Daily elector changes, additions, deletions and moves within authorities are easily processed, with automatic sequential elector numbering, previous authority locator and automatic acknowledgement letters produced. Daily and monthly notices, letters and information for other authorities can be produced as and when required.

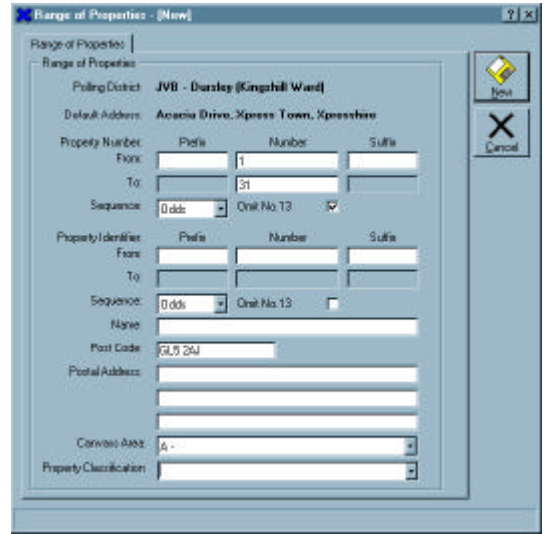

Keep track of your elector changes with full change history and facilities for producing registers and reports for previous rolling register months.

A new elector's previous local authority is found automatically on entering the elector's previous postcode.

Register Search

Having trouble finding someone on your register? eXpress is here to help with our unique fuzzy search facility which finds electors from a single line of information.

Enter a postcode, house number, part of a name, eXpress Fuzzy Search will do the rest, finding electors and properties with ease.

Form-A Processing (Workflow)

Send canvass forms directly to your printing bureau or produce them in-house in the style and order you require. Statistics about canvass form production and canvass performance are available directly from eXpress.

Take advantage of the integrated canvass form image processing with automatic canvass form scanning and bar-code recognition. Access the onscreen image queue, and make changes to elector and property data using the scanned canvass form image displayed simultaneously on screen.

Don't file, sort, search or work from paper canvass forms again! All scanned canvass forms are available online for instant access for as many years as required.

Elector Scanning

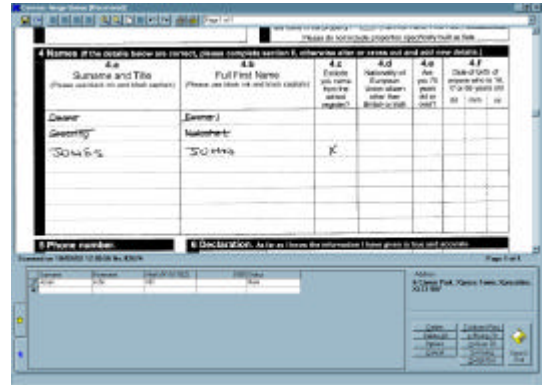

Correspondence, application forms etc. can be scanned and stored with each elector ready for instant recall for as many years as you require. Elector document history can provide complete picture of out-going and incoming correspondence.

Need a copy of a scanned document, just let eXpress print a copy for you, no need to find the original.

GIS and BS7666

Take advantage of the latest technologies and link your streets and properties to your corporate geographical information systems (GIS.)

eXpress is compliant with data standards as laid out in BS7666. With interfacing systems and controls which allow the use of NLPG address or alternative address.

Documents

eXpress provides a comprehensive range of letters, labels and reports. It has never been so easy to change your own documents and reports, as eXpress integrates seamlessly with Microsoft Word® and Seagate Crystal Reports®. A complete history of documents sent to electors can be maintained.

eXpress electoral register has over 400 standard letters, labels and reports including a complete range of application forms, acknowledgement letters and best value random selections.

Letters and reports are fully customisable and can be previewed, printed or exported.

Departmental Access

Allow other departments and users read only access to published information and restrict searches to properties only together with on screen guidance regarding the use of electoral register data. Optionally the system can be fronted by your own internet/intranet systems.

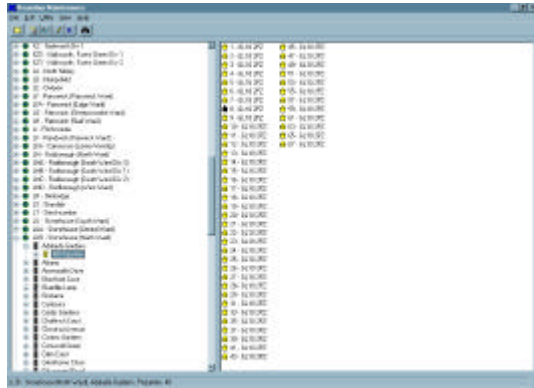

Don't be interrupted by other departments wanting to check entries on the register, let eXpress disseminate the information.

Boundary Maintenance

eXpress boundary maintenance has no limitations: use the Windows Explorer® style screens to drag-'n'-drop your data between polling districts or streets. No data loss or re-keying required, all statistics are instantly updated and available onscreen. Incorrect changes can always be undone with ease.

Implement or model boundary changes with simple drag-'n'-drop technology.

Reference	Line Property	Cancelled Properties	Unsuccessful Properties	Forms Received	Changes	Net Margin
A	% of Candidate Properties	0,021	0,000	1	0,000	0,000
B	% of Candidate Properties	0,201	0,201	0	0,000	0,000
C	% of Candidate Properties	0,040	0,040	1	0,000	0,000
D	% of Candidate Properties	0,011	0,011	0	0,000	0,000
E	% of Candidate Properties	0,000	0,000	0	0,000	0,000
F	% of Candidate Properties	0,007	0,007	0	0,000	0,000
G	% of Candidate Properties	0,002	0,001	1	0,000	0,000
H	% of Candidate Properties	0,004	0,004	0	0,000	0,000
I	% of Candidate Properties	0,001	0,001	0	0,000	0,000
J	% of Candidate Properties	0,004	0,004	0	0,000	0,000
K	% of Candidate Properties	0,004	0,004	0	0,000	0,000
L	% of Candidate Properties	0,004	0,004	0	0,000	0,000
M	% of Candidate Properties	0,010	0,010	0	0,000	0,000

Technical Information

eXpress is a 32bit client server application, operating in Microsoft Windows 95® or above. eXpress is optimised to work with Microsoft SQL Server 7® or above and harnesses the power of Microsoft Office 97® or above.

eXpress is committed to the future of electoral registration and elections, to this end eXpress is continually working with its customers on future initiatives including election pilots, the LASER project and IdeA to provide systems which meet the demands of eGov.

User Group

eXpress actively supports the independent eXpress user group dedicated to electoral registration and election management.

Customer Support

The eXpress systems are supported by a team of dedicated and experienced staff all with local authority backgrounds in both elections and information technology.
